

How EcoTex™ Works

1

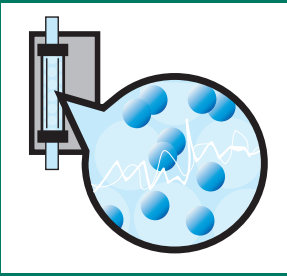

EcoTex™ utilizes an oxygen concentrator which takes in air and converts it to 90% pure oxygen

5

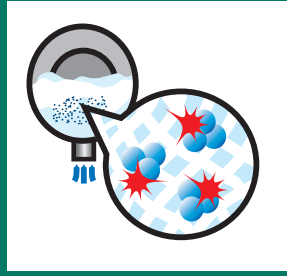

The ozone immediately attacks bacteria and soiling. It is more effective and kills bacteria much faster than chlorine bleach

2

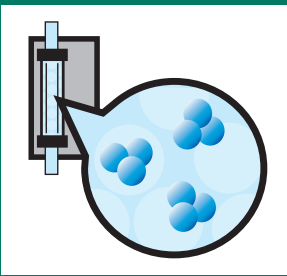

The oxygen we breathe is made up of two atoms paired together. An ozone generator separates the atoms with an electrical arc

6

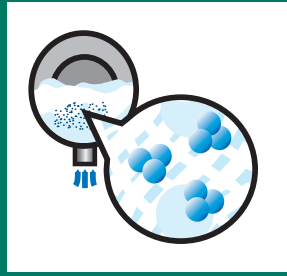

Fibers in materials are lifted, giving laundry a softer feel and prolonging its life.

3

The atoms reassemble into groups of three - this is ozone, an environmentally friendly natural gas

7

EcoTex™ uses mostly cold water and is perfectly safe because the ozone it utilizes quickly reverts back to oxygen

4

A unique diffuser makes the ozone soluble by defusing it into water in the washing machine drum

8

EcoTex™ produces clean, fresh laundry totally free of bacteria on every cycle - completely eliminating the risk of human error.
